

FAUN SERVICES

Proximity and responsiveness

Innovation for
a smarter waste collection

FAUN SERVICES®

FAUN, a major player in the waste collection and urban cleaning vehicle market, stands out for its innovations in «smart collection».

FAUN equipment, entirely manufactured in France, is indeed recognized for its low noise levels, reduction of greenhouse gas emissions, increased safety for operators, and maximum efficiency thanks to high compaction technologies.

Intervening as quickly as possible, staying as close as possible to businesses

The 9 FAUN SERVICES centers in Île-de-France (Chelles), Languedoc (Maraussan), Nord (Noyelles-Godault), Normandy (Le Gros-Theil), Nouvelle-Aquitaine (Mérignac), Occitanie (Bouloc), PACA (Flassans-sur-Issole), Pays de la Loire (Les Sorinières), and Rhône-Alpes (Guilherand-Granges) manage all interventions or repairs for all brands, even the most extensive ones:

- › RCV (Refuse Collection Vehicle), Sweeper, and City Vehicle repairs
- › Electrical, hydraulic, mechanical, automation, adjustments, steel and aluminum fabrication...
- › Optimizing equipment operation
- › Refurbishment and extending their lifespan

Advantages

- › **Personalized service**, anywhere in France
- › Better territorial coverage
- › A dedicated point of contact: the Service Center Manager, who thoroughly understands the reality of customers' operations

A network of selected partners, authorized by FAUN and spread across the country, completes the offering by providing all the local services expected by customers.

Expertise and responsiveness

FAUN SERVICES ensures its customers quality services that only the expertise of a major manufacturer can guarantee:

- › Fault diagnosis expertise
- › Knowledge of technologies
- › Availability of all after-sales activities
- › Maintaining equipment to standards
- › Increased safety
- › Genuine spare parts

FAUN SERVICES prioritizes the responsiveness essential for successful collections:

- › Minimizing response and downtime
- › Dispatching specialists to customers' sites for precise and very short interventions
- › Implementing mobile intervention solutions, with on-board repair equipment, when the repair does not require a workshop visit

FAUN SERVICES offers
its customers ever
more expertise and speed

FAUN ICONNECT.

The new connected maintenance system

Depending on the option chosen, this exclusive connected maintenance system created by FAUN enables remote maintenance of your bodies in real-time and/or their maintenance tracking over time.

The on-board electronics in your body allow FAUN technical support to provide remote maintenance services on your vehicle in real-time.

By connecting to the FAUN platform, you are supported in tracking the maintenance of your equipment through a calendar accessible on the FAUN platform, which is hosted in France.

- Faster interventions
- Increased «mobility» of expertise
- Possibility of using FAUN experts on a time-sharing basis
- Optimization of interventions

FAUN LOCATION.

Short and long-term rental

- > FAUN provides its partners with a fleet of vehicles ranging from 5 to 29 m³: City vehicles for city center collection, RCVs for the collection of household and industrial waste, BIO waste, green waste, and bulky items, whether in bins or underground containers, as well as vehicles for street maintenance.
- > The outsourcing offered by FAUN allows businesses and local authorities to achieve precise budget planning in order to control their investment (IFRS standard) and operating budgets, without tying up their borrowing capacity.

VITEFAUN a service for the immediate handling of bodies.

TECFAUN remote Technical Assistance to answer urgent questions.

The **Mobile Service**, 18 expert technicians traveling across France in vehicles equipped with tools and genuine spare parts.

SECURITY AND PEACE OF MIND CONTRACTS

The partnership to reduce the cost of ownership of a body

- > FAUN specialized technicians work on all types of equipment with all the expertise and know-how necessary to guarantee the longevity of the bodies.
- > The responsiveness of the Service Centers prevents prolonged equipment downtime.
- > Maintenance performed by the manufacturer reduces the cost of ownership for the operator.

Operations	EXPERTIFAUN	PREVENTIFAUN	OPTIMAFSAUN+(2)	Frequency
