VERSATILITY

MAXINÉA

Ideal for mixed collection

Citadines are specially designed to collect municipal and household waste in city centres and historic centres. In their low hopper version, they are also used by city cleaning services to empty city waste bins (manual collection).

Their manoeuvrability gives Citadines the added advantage of speedier waste collection. Operating costs are further reduced by using an LCV, which is lower maintenance and cuts fuel costs.

The aluminium alloy design (shovel and truck) gives the vehicle the highest useful load on the market in its size category.

All the Citadines models can run in electric mode.

Economic gains and minimised disruption

MAXINÉA: Maximum collection in urban and peri-urban areas

- › Functional and highly maneuverable thanks to a narrow, short-wheelbase chassis, it enables efficient collection in tight streets and eliminates reversing maneuvers (in accordance with the French CNAMTS R437 safety recommendation).
- › Easy collection in urban and peri-urban areas.
- › Aluminum alloy body, carriage, and compaction blade to maximize available payload.
- › Ideal for mixed collection.

Une collecte de précision

- › Emptying of several 750-liter containers into the body without requiring immediate compaction (8 m³ useful internal volume).
- › Bin lifter for 80 to 1,100-liter bins (2 or 4 wheels).
- › Rear hatch for manual bulk loading.
- › Compaction via a double articulated packer blade driven by a sliding carriage, maximizing payload capacity.
- › Watertight, double-skinned aluminum alloy body.

Economic gains and energy performance

Designed to last

- › Smooth, double-skinned honeycomb body made of aluminum alloy, guaranteeing long service life as it is non-deformable, corrosion-resistant, and 100% recyclable.
- › Spare parts readily available.
- › All body components comply with CE standards.

Ergonomics

- › Advanced electronic management enabling remote diagnostics with after-sales service, paired with an interactive in-cab display for faster troubleshooting and interventions.
- › User-friendly controls and rapid operating cycles.
- › Easy maintenance.
- › Low-entry cab perfectly suited for frequent and repetitive entry and exit.
- › Side-stowing footboards as standard.

Performance

- › Technical payload capacity: 3 t on chassis from 7.5 t GVW.
- › Internal body volume: 8 m³.
- › Bin lifter with a 450 kg lifting capacity.
- › This equipment fully complies with the EN 1501 standard and is EC type-certified by Socotec Industries.

Vehicle leasing, a winning option!

Now, more than ever, waste collection companies and local authorities are having to focus on controlling their finances. In order to allow market players to pursue a viable business policy, FAUN is progressively developing its concept: «Vehicle leasing - a winning option»!

The outsourcing arrangement proposed by FAUN allows companies and local authorities to make a detailed budget plan, thus increasing control over their investment (IFRS standard) and operating budget, without impacting their borrowing power.

Effective maintenance management and a high-tech vehicle fleet speeds up vehicle turnaround times.

FAUN provides its partners with a vehicle fleet ranging from 5 to 29 m³: Citadines for city centre waste collection, waste collection trucks for picking up household waste, industrial waste, organic waste and bulky waste, whether in trays or underground containers, together with road maintenance vehicles.
